

I-FAMOUS DEMO PROPOSAL

Supervisor Matching Test File

Student Name	Lim Wei Jie
Matric Number	A24MJ4001
Project Type	Development
Expected AI Match	Expected best match: Dr. Lim Wei Jie, because his expertise is Database Systems, Academic Information Systems, and Automation.

Project Title

Database-Driven Academic Information and Automation System

Abstract

This project proposes a database-driven academic information system that centralizes student records, project data, supervisor assignments, timetable records, and assessment status into a structured relational database. The system focuses on database design, academic information management, automated record updates, query-based reporting, and data integrity. It supports coordinators by reducing manual spreadsheet work and improving consistency in FYP data handling. The project includes database schema design, data import, automated information retrieval, academic workflow automation, and dashboard reporting for decision support. The expected outcome is a reliable database-centered platform that improves academic administration and reporting efficiency.

Keywords

Database Systems, Academic Information Systems, Automation, MySQL, Data Integrity, Reporting, Academic Records

Testing Note

Upload this file in Manage FYP. The system should extract the title, abstract, and keywords, then produce a different top supervisor recommendation based on the lecturer expertise stored in your database.
